Slip Knot Tying Instructions

*Picture 1*
Hold a length of rope out in front of you and twist to form a loop.

*Picture 2*
Reach through the loop, grasp the dangling right end by the middle, and pull it through the loop, being careful not to let the end come through. Keep your left hand steady, and a knot will tighten around the part you are pulling through.

*Picture 3*
You can place the snood inside the new loop and pull the main length of the rope to tighten around it.
